Proverbs Selected

1. When you think about wise speech or speaking in light of God, what first comes to mind? What to say? What to avoid? What specifically?
2. When is the first time you still remember someone's words impacting you for good or ill? When is a time you remember your words impacting someone else in a way you rejoice in or regret?
3. How often do you think carefully before you speak? What filters do you use on your words before sending an email, a text, or any other communication?
4. What is one specific exciting way God may be calling you to use your words to heal? What is one specific way God is convicting you about your words that hurt?
5. Think of a time you said something you later said you didn't mean. What does the Bible teach us about the connection between our words and our hearts and thus the need to look deeper at what our words expose?
6. How could someone pray for your heart in a way that would impact the words you speak to friends? Kids? Family? Neighbors?
